

Bug Report

Bug ID: BUG-001001

Title: Name and Email Validation Issues

Environment:

Device: Desktop

OS: Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Open the registration form.
2. Enter a name with spaces before and after the text (e.g., " John Doe ").
3. Enter an email with invalid formats like "user@domain.toolongtlddddd".

Expected Result

- The name field should not allow spaces before and after the text.
- The email field should reject invalid formats like excessively long domain extensions.

Actual Result:

- The name field allows spaces before and after the text.
- The email field accepts invalid email formats like "user@domain.toolongtlddddd".

Title:Logout Confirmation Popup Missing

Environment:

Device: Desktop

OS :Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Log into the application.
2. Click the logout button.

Expected Result:

A confirmation popup should appear, asking if the user is sure they want to log out.

Actual Result:

The user is logged out immediately without any confirmation prompt.

Title: Reset Password Request Sent on Logo Click

Environment:

Device: Desktop

OS: Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Go to the reset password page.
2. Click the logo.

Expected Result:

Clicking the logo should navigate to the homepage, not trigger a backend reset request.

Actual Result:

Clicking the logo sends an unnecessary backend request to reset the password.

Title: Token Reuse After Logout

Environment:

Device: Desktop

OS :Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Log in to the system.
2. Log out.
3. Attempt to use the same token to access the application.

Expected Result:

After logging out, the token should not be reusable and should be invalidated.

Actual Result:

The same token can still be used after logging out, allowing unauthorized access.

Severity: High

Bug ID: BUG-001005

Title: Button Enablement Before Form Validation

Environment:

Device: Desktop

OS :Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Open a form on the application.

2. Enter invalid data in the form fields.

3. Observe the button state.

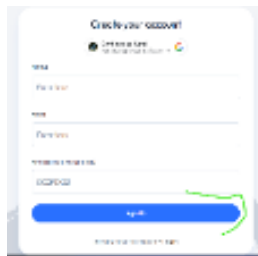

Expected Result:

The submit button should remain disabled until all form fields are valid.

Actual Result:

The submit button is enabled even before the form fields are validated, allowing submission of invalid data.

Title: No Character Limit for Name and Email Fields

Environment:

Device: Desktop

OS :Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Open the registration form.

2. Enter a name or email with more than 100 characters.

Expected Result:

There should be a character limit for the name and email fields to prevent excessively long inputs.

Actual Result:

There is no character limit, allowing very long names and emails to be entered.

Title: Space Handling in Name Field

Environment:

Device: Desktop

OS :Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Open the registration form.
2. Enter a name with spaces before or after (e.g., " John Doe ").

Expected Result:

Spaces before and after the name should be removed or flagged as invalid.

Actual Result:

The form allows spaces before and after the name without any error, although it displays an error when spaces are in the middle.

Title: Invalid Email Format Not Flagged

Environment:

Device: Desktop

OS :Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Open the registration form.
2. Enter an email with an invalid format (e.g., "user@domain.toolongtlddddd").

Expected Result:

Invalid email formats should trigger an error and prevent submission.

Actual Result:

Invalid email formats like "user@domain.toolongtlddppp" are accepted and submitted without error.

Severity: High

Bug ID: BUG-001009

Title : Links Not Highlighted Properly

Environment:

Device: Desktop

OS :Windows 11

Browser: Google Chrome (Version 109.0.5414.87)

Steps to Reproduce:

1. Go to the reset password page.
2. Observe that signup and login links are not highlighted as hyperlinks.

Expected Result:

Links such as "Signup" and "Login" should be highlighted with proper styling to indicate they are clickable.

Actual Result:

Links like "Signup" and "Login" are not styled as hyperlinks and do not stand out visually as clickable elements.
